

Differentiate Yourself

Kirk Paul Lafler, Software Intelligence Corporation, Spring Valley, California

Abstract

Today's employment and business marketplace is highly competitive. As a result, it is necessary for SAS® professionals to differentiate themselves from the competition. Success depends on a number of factors, including positioning yourself with the necessary technical skills in relation to the competition. This presentation illustrates how SAS professionals can acquire a wealth of knowledge and enhance their skills by accessing valuable and free web content related to SAS. With the aid of a web browser and an Internet connection, anyone can access published PDF papers, Microsoft Word documents, Microsoft PowerPoint presentations, student notes, instructor lesson plans, hands-on exercises, webinars, audios, videos, a comprehensive technical support website maintained by SAS, and more to acquire the essential expertise that is needed to cut through all the marketplace noise and begin differentiating yourself to secure desirable opportunities with employers and clients.

Introduction

As technology continues to reach for newer and greater horizons, it is becoming increasingly more important for students, professionals, and anyone with a curiosity for knowledge to have a way to continue their quest for learning. In a summary report on employment projections, the Bureau of Labor Statistics project that ***“nineteen of the 30 occupations projected to grow fastest from 2012 to 2022 will typically require some form of postsecondary technical education for entry.”***

In a 2012 report by ITCareerFinder.com the organization states, ***“A number of IT career paths will experience the most growth from 2012 to 2020 with pay salaries well above the national average and offer a wide range of opportunities for upward mobility.”*** The fastest growing IT jobs from 2012 to 2020 according to the Bureau of Labor Statistics Occupational Outlook Handbook (2012-2013) are illustrated in Figure 1, below.

Number	IT Job	Estimated Growth	Average Salary
1	Mobile Application Developer	34%	\$94,000.
2	Database Administrator	33%	\$82,000.
3	Software Engineer / Developer	30%	\$90,000.
4	Video Game Designer	30%	\$80,000.
5	Network Administrator	28%	\$69,000.
6	IT Security Specialist	22%	\$87,000.
7	Computer Systems Analyst	22%	\$79,000.
8	Web Developer	22%	\$91,000.
9	Health Information Technician	21%	\$46,000.
10	Technology Manager	18%	\$111,000.

Figure 1. U.S Bureau of Labor Statistics Fastest Growing IT Jobs (2012 – 2020)

The future looks outstanding for SAS users too. In early 2015, SAS Institute announced on sas.com that, ***“The future looks very bright for SAS programmers, data analysts, analytic specialists, statisticians, and other SAS specialties in 2015 and beyond with demand projections expected to climb to higher levels.”*** In another 2015 report by CNN Money, the employment outlook for SAS specialists is very bright indeed with median pay for SAS programmers to be upward of the \$90,000 range and an estimated 10-year job growth of 24.6%.

SAS Institute continues its steady growth by dominating in several “key” areas including the world of big data and data analytics. With 2015 Worldwide Revenue of \$3.16 billion (U.S.) and an R&D Investment of 25% of Revenue, SAS is in an enviable

position as a top 10 software company. Having more than 14,000 employees located throughout the United States, Canada, Europe, Middle East, Africa, Asia Pacific and Latin America; and more than 80,000 business, government and university customer sites in 146 countries, SAS software is used by 91 of the top 100 companies on the 2015 Fortune Global 500 List. It has even won the coveted **“Best Place to Work”** Awards two consecutive years, (2011 – 2012), and has taken the third and fourth spots in 2013 and 2014 respectively. Employees and users everywhere should be very excited about the future.

Differentiate Yourself

Anyone looking to stand out from the crowd and/or begin your rise to the top must learn how to differentiate themselves. But how is this accomplished? Invest in yourself. Take initiative. Pursue excellence in everything you do. Look for opportunities and, more importantly, make the most of every opportunity. Understand the impact of and, more importantly, how to leverage technology. Become involved by volunteering at your in-house, local, regional, special-interest and/or international SAS users group conferences and meetings. Become dedicated to something greater than oneself. These are just a few ways to stand out from the masses – make it happen.

Start by Taking Inventory of and/or Developing Your Skills

The Free Merriam-Webster Dictionary defines skill as, **“the ability to do something that comes from training, experience, or practice.”** A skill must be developed – one isn’t born possessing many desirable skills. So, how does one go about determining if they already possess a useful skill? Begin by taking inventory of any skills you might already possess – simply make a list. The list might look something like the following, see below.

Inventory of Existing Skills
DATA/PROC Step Programming
Data Access
Data Transformation
Data Cleaning
Data Manipulation
ODS, Reporting and Specialized Output
Macro Programming
Statistical Analysis
Data-driven Application Development
User Interface Design
Database Design
Technical Writing

Now that you’ve taken inventory of your skills, assign a ranking to each skill using the following values.

Ranking of Existing Skills
0 = None
1 = Heard of it, but little or no experience
2 = Some working knowledge
3 = Proficient
4 = Expert

Once you’ve assessed and ranked your skill level, assign a ranking to your level of competence using the following values.

Identify Level of Competence
0 = None
1 = Out-of-date
2 = Competitive
3 = Cutting Edge

Finally, categorize your skills by functional discipline, as follows.

Categorize Skills by Functional Discipline
Requirements Analysis
Systems Analysis
Application Design
User Interface Design
Report, Table and Chart Design
Data Cleaning
SDLC
Programming
Statistical analysis
Teaching
Technical Writing
Technical Support
Debugging

How to Develop and Improve Your Skills

There are a number of ways for SAS users to develop and/or improve their skills. The following list identifies many popular methods SAS professionals have used to enhance their skills and, as a result, become more competitive.

Popular Methods of Developing and Improving Skills	
1) Download, use and learn valuable techniques using the “free” SAS University Edition software	
2) Access the SAS Technical Support website at support.sas.com	
3) Download and use the “free” Online SAS documentation	
4) Access the published “White” papers on LexJansen.com	
5) Learn SAS techniques from user-written books from SAS Press	
6) Author / present at in-house, local, regional, special-interest and international SAS user groups	
7) Attend hands-on workshops, presentations and courses	
8) Volunteer at in-house, local, regional, special-interest and international SAS user groups	
9) Collaborate / Network with other SAS users	
10) Learn from self-paced web-based training	
11) Successfully pass one or more SAS Certification exams	

To better understand what skills have the greatest impact to salaries, PayScale, Inc., a Seattle-based company, shares their list of skills, along with the percentage increase to the salaries, of SAS programmers, see below.

Skill	Percentage Increase
UNIX	▲ 19%
Linux	▲ 13%
PL/SQL	▲ 12%
Oracle	▲ 11%
Windows Operating System	▲ 10%
SQL	▲ 5%
Statistical Analysis	▲ 5%
Data Analysis	▲ 2%
Microsoft Access	▲ 2%
National Average	\$78,000

How to Differentiate Yourself

Being able to differentiate yourself from the competition is a meaningful activity that every SAS professional should consider. Although not comprehensive, the following list identifies a few popular methods that SAS professionals have shared with me to help them separate themselves from their competition.

Popular Methods of Differentiating Yourself from the Competition	
1)	Earn an Advanced Degree
2)	Attend, Volunteer and Present at in-house, local, regional, special-interest and international SAS user groups
3)	Share Your Knowledge with Colleagues
4)	Read, Study and Learn from the published “white” papers on LexJansen.com
5)	Access and Learn One New Technique Each Day from the Content on support.sas.com
6)	Become SAS Certified (Base, Advanced, Clinical Trials, Predictive Modeler, Statistical Business Analyst, BI Content Developer, Visual Business Analyst, Data Integration Developer, Data Quality Steward, Platform Administrator)
7)	Build Social Networking Connections on LinkedIn, Blogs, etc.

Massive Open Online Content (MOOC)

A MOOC is structured very similar to an online course. A MOOC typically is listed with a course/seminar/webinar title, abstract or description of its content, a syllabus, expected learning objectives, “live” or recorded lectures or lessons, reading assignments, hands-on assignments, and quizzes. Students tune in to the “live” or recorded lectures, perform the required reading and hands-on assignments, and take the quizzes, adhering to the required scheduled timeline. At the completion of a MOOC, students may even be able to receive a grade from the MOOC leader or instructor, just as if they had enrolled in a traditional course.

Many forward-thinking organizations, universities and degree-granting institutions use the advances that technology provides to help make some of their courses available to the masses around the world. The MOOC format offers an alternative to mainstream courses, degrees, and certificate programs that were once only available through brick-and-mortar classrooms where attendees were forced to commute to supported locations or become a resident on college campuses.

A Review of “Free” MOOC Resources

As the age of massive open online content (and courses) is upon us, the world of the SAS user is also being positively impacted with many “free” MOOC resources. Numerous MOOC courses and content are now available to help support SAS users in their quest to effectively improve their analytical, programming, statistical, and reporting skills. For content and courses that may contain a sizeable amount of material, some MOOC offerings may involve splitting larger and more involved topics into smaller, more digestible, pieces, a process known as specializing. So, where can SAS users find “free” MOOC resources? The following list of “free” MOOC resources is available to SAS users everywhere.

“Free” MOOC Resources for SAS Users	
1)	SAS University Edition software
2)	SAS Technical Support website at support.sas.com
3)	Online SAS Documentation in PDF and HTML format on support.sas.com
4)	Published “White” Papers on LexJansen.com
5)	SAS Press and SAS Talks Webinars
6)	SAS YouTube Channel Videos
7)	In-house and Local SAS Users Group meetings

SAS® University Edition Software

The SAS® University Edition is “free” to anyone. It’s under the SAS Analytics U umbrella and includes e-Learning modules to help you learn the SAS software. Available for PC, Mac, or Linux Workstations, the SAS University Edition includes Base SAS®, SAS/STAT®, SAS/IML®, SAS/ACCESS® for Windows, and SAS Studio. It works through Virtualization Software in standalone mode and your Browser to access to SAS software.

Base SAS Features

The Base SAS software contains a built in DATA step programming language, the ability to access a wide-range of data sources, comprehensive set of functions to handle data manipulation, an assortment of “canned” and ready-to-use procedures, a comprehensive SQL language, reporting and customization feature for reports and results using Output Delivery System (ODS), data display informats and output formats, comprehensive data visualization features known as ODS Statistical Graphics, data management capabilities, and much more.

SAS/STAT® Features

The SAS/STAT software supports the application of the latest statistical techniques. It supports the following statistical routines: Analysis of Variance, Bayesian Analysis, Categorical Data Analysis, Cluster Analysis, Mixed Models, Multivariate Analysis, Nonparametric Analysis, Regression Analysis, Survey Sampling and Analysis, Statistical Graphics, and much more.

SAS/IML® Features

The SAS/IML software is an interactive matrix programming language and supports the ability to conduct Exploratory Analysis, the integration with the R programming language, dynamically linked graphics, and much more.

SAS/ACCESS® Features

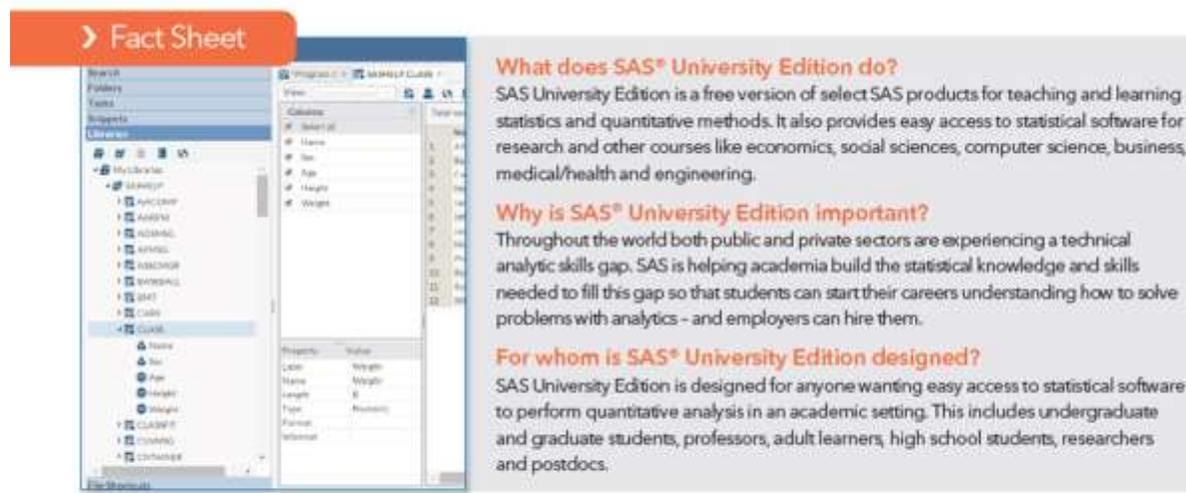

The SAS/ACCESS software supports the ability to read, write, and update data sources; provides a flexible query language; supports the access to a variety of data sources including text files, dat files, CSV files, Excel spreadsheets, Microsoft SQL Server, and ODBC; and much more.

SAS Studio

The SAS Studio software serves as the user interface; supports Web applications; the access to data files, libraries and programs; the ability to recover files; dynamically link graphics; and much more.

SAS University Edition Fact Sheet

The SAS University Edition software Fact Sheet can be access at sas.com/universityedition, see Figure 1, below.

Fact Sheet

What does SAS® University Edition do?
SAS University Edition is a free version of select SAS products for teaching and learning statistics and quantitative methods. It also provides easy access to statistical software for research and other courses like economics, social sciences, computer science, business, medical/health and engineering.

Why is SAS® University Edition important?
Throughout the world both public and private sectors are experiencing a technical analytic skills gap. SAS is helping academia build the statistical knowledge and skills needed to fill this gap so that students can start their careers understanding how to solve problems with analytics - and employers can hire them.

For whom is SAS® University Edition designed?
SAS University Edition is designed for anyone wanting easy access to statistical software to perform quantitative analysis in an academic setting. This includes undergraduate and graduate students, professors, adult learners, high school students, researchers and postdocs.

SAS® University Edition
Free statistical software to improve research and launch careers

SAS' "World Class" Technical Support Website

SAS' technical support website, support.sas.com, contains a wealth of "free" SAS technical support content. Users are provided with access to timely information pertaining to: Admin, Programmer, Statistician and User content; the "best" in class comprehensive technical support content; training and books; what's happenings including User Group Information; access to "free" webinars and podcasts; access to code samples; access to SAS comprehensive documentation; and much more. The support.sas.com user interface is illustrated in Figure 2, below.

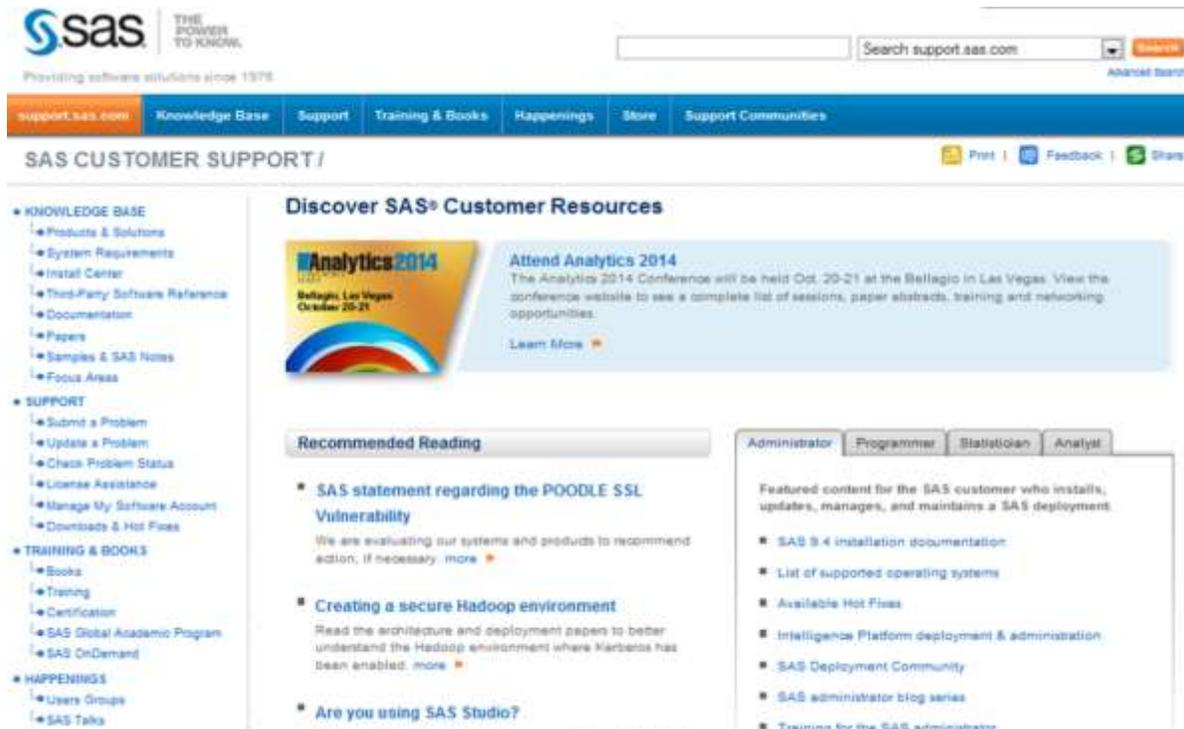

Figure 2. support.sas.com User Interface

Knowledge Base – SAS Products and Solutions

Users can easily explore the Knowledge Base of SAS Products and Solutions, System Requirements, Install Center, Third-Party Software Reference, Documentation, Papers, Samples & SAS Notes, and Focus Areas by accessing <http://support.sas.com/software/>, illustrated in Figure 3, below.

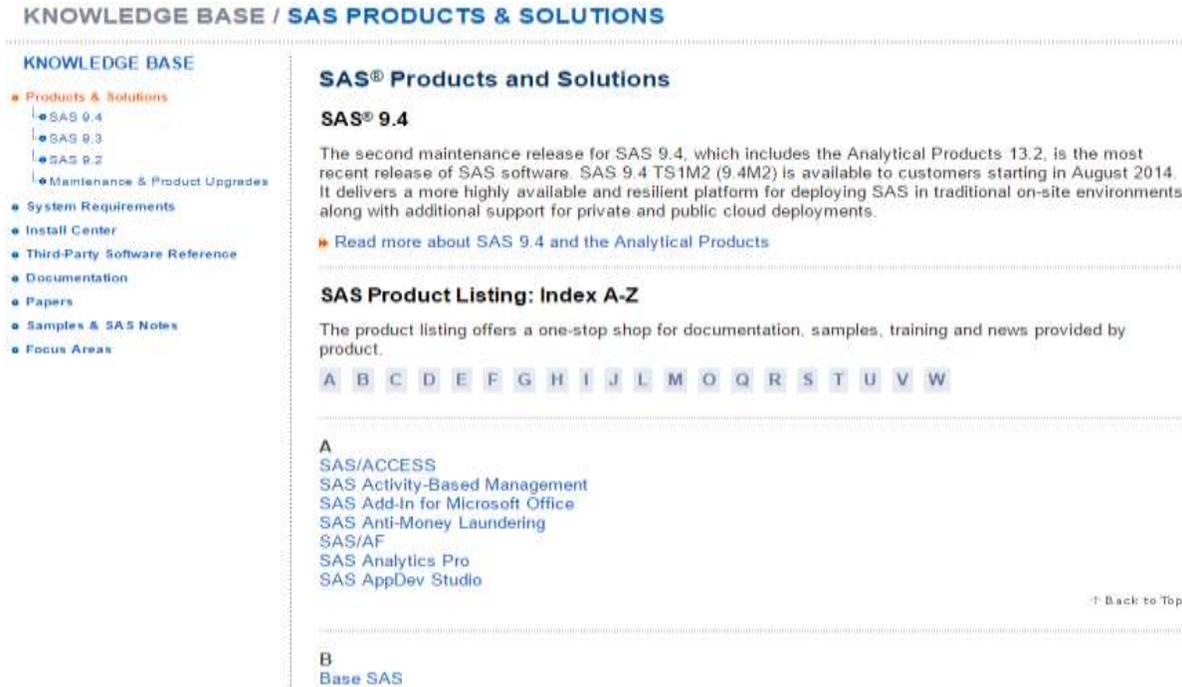

Figure 3. Knowledge Base – SAS Products and Solutions

Knowledge Base – Documentation

Users have the ability to access a comprehensive set of SAS product documentation in either HTML or PDF format and can be accessed at <http://support.sas.com/documentation/index.html>, as shown in Figure 4, below.

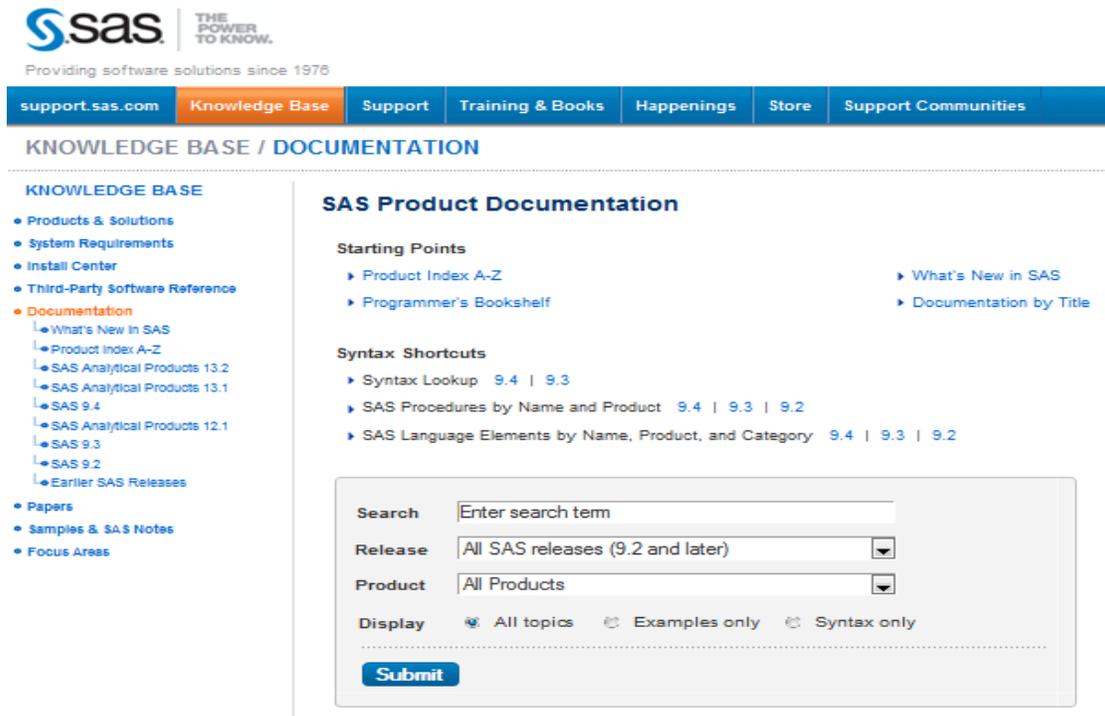

Figure 4. Knowledge Base – SAS Product Documentation

Published SAS Proceedings and “White” Papers

Users are provided access to thousands of “free” published SAS “white” papers all in the form of PDF documents. Provided with a built-in Google® search applet, users are able to search for content from 1976 to the present from SGF / SUGI, SUEGI, the various Regional conferences, PharmaSUG / PharmaSUG China, PhUSE, CDISC Forum, and other venues. Papers can be accessed using the <https://www.lexjansen.com/> user interface, as shown in Figure 5, below.

Figure 5. Published SAS Proceedings on www.lexjansen.com

LexJansen.com – Search Feature

LexJansen.com provides a built-in Google search applet that can be used by users to find papers of interest, as shown in Figure 6, below.

Figure 6. Built-in Google Search Applet in LexJansen.com

LexJansen.com – Search Results

LexJansen.com’s search results display the most relevant results first, based on the search keyword or phrase entered in the search box, as illustrated in Figure 7, below.

This searches SAS proceedings from SAS Global Forum, SUGI, PharmaSUG, PhUSE, NESUG, SESUG, SCSUG, WUSS, MWSUG, SCSUG and PNWSUG.

About 5,270 results (0.27 seconds)

This searches SAS proceedings from SAS Global Forum, SUGI, SEUGI, MWSUG, NESUG, PharmaSUG, PhUSE, PNWSUG, SESUG, SCSUG, WUSS, SCSUG and Views. A maximum of 100 results will be returned (Google Custom Search limit).

About 7,330 results (0.30 seconds)

Paper BB03-2014

Five Little Known, But Highly Valuable and Widely Usable, PROC SQL Programming Techniques

Kirk Paul Lafler, Software Intelligence Corporation, Spring Valley, California

Abstract

The SQL Procedure contains a number of powerful and elegant language features for SQL users. This presentation highlights five little known, but highly valuable and widely usable, topics that will help users harness the power of the SQL procedure. Topics include using PROC SQL to perform FIRST., LAST., and Between in BY-group processing; constructing and searching the contents of a value-list macro variable for a specific value; data validation operations; data summary operations to process down rows and across columns; and using the MSGLEVEL= system option and _METHOD SQL option to capture and gain greater insight into the processes during query evaluation, the algorithm selected and used by the optimizer when processing a query, testing and debugging operations, and other processes.

Introduction

The SQL procedure is a wonderful tool for querying and subsetting data; restructuring data by constructing case expressions; constructing and using virtual tables known as a view; access information from Dictionary tables; and joining two or more tables to explore data relationships. Occasionally, an application problem comes along where the SQL procedure is either better suited or easier to use than other more conventional DATA and/or PROC step methods. As each situation presents itself, PROC SQL should be examined to see if its use is warranted for the task at hand.

Example Tables

The examples used throughout this paper utilize a database of two tables. (A relational database is a collection of tables.) The data used in all the examples in this paper consists of a selection of movies that I've viewed over the years. The Movies table consists of six columns: title, length, category, year, studio, and rating. Title, category, studio, and rating are defined as character columns with length and year being defined as numeric columns. The data stored in the Movies table is depicted below.

MOVIES Table

	Title	Length	Category	Year	Studio	Rating
1	Blade Heat	177	Action/Adventure	1995	Paramount Pictures	R
2	Carabelleca	103	Drama	1942	MGM / UA	PG
3	Christmas Vacation	97	Comedy	1989	Warner Brothers	PG-13
4	Coming to America	116	Comedy	1988	Paramount Pictures	R
5	Dracula	130	Horror	1933	Columbia TriStar	R
6	Dressed to Kill	105	Drama/Mystery	1980	Filmways Pictures	R
7	Forest Gump	142	Drama	1994	Paramount Pictures	PG-13
8	Shool	127	Drama/Romance	1990	Paramount Pictures	PG-13
9	Jaws	125	Action/Adventure	1975	Universal Studios	PG
10	Jurassic Park	127	Action	1993	Universal Pictures	PG-13
11	Lethal Weapon	110	Action/Comedy & Robber	1987	Warner Brothers	R
12	Michael	106	Drama	1997	Warner Brothers	PG-13
13	National Lampoon's Vacation	98	Comedy	1983	Warner Brothers	PG-13
14	Poltergeist	115	Horror	1982	MGM / UA	PG
15	Rocky	120	Action/Adventure	1976	MGM / UA	PG
16	Scarface	170	Action/Comedy & Robber	1983	Universal Studios	R
17	Silence of the Lambs	118	Drama/Suspense	1991	Orion	R
18	Star Wars	124	Action/Sci-Fi	1977	Lucas Film Ltd	PG
19	The Hunt for Red October	135	Action/Adventure	1990	Paramount Pictures	PG
20	The Terminator	108	Action/Sci-Fi	1984	Live Entertainment	R
21	The Wizard of Oz	101	Adventure	1939	MGM / UA	G
22	Titanic	194	Drama/Romance	1997	Paramount Pictures	PG-13

The data stored in the ACTORS table consists of three columns: title, actor_leading, and actor_supporting, all of which are defined as character columns. The data stored in the Actors table is illustrated below.

In this session, you'll discover an easy-to-use Project Organization Proposal (POP) that can be implemented without adding additional resources to the MIS or IT divisions.

**Time Series Data Mining with SAS® Enterprise Miner™**

Udo Sglavo from SAS R&D examines the benefit of considering the time dimension in SAS Enterprise Miner projects and how users will benefit from time series similarity analysis.

**An ODS Menu for All Appetites and Applications**

Chevell Parker from SAS Technical Support reveals how to harness the power of various ODS destinations to generate memorable applications and reports.

**Consider an Analytical Center of Excellence (and Other Ways to Create More Analytic Bandwidth)**

Anne Milley, Director of Analytic Strategy at JMP.

**Macros Made Easy (and More Efficient) with SAS® Enterprise Guide® 4.2 Prompts**

Kenneth Sucher, SAS Certified Instructor.

**Web Development with SAS® by Example**

SAS Press author Frederick Pratter will introduce you to some of the products and features available for creating Web content using SAS.

**Tips and Tricks for Finding SAS® Information**

Get tips and tricks to help you be more productive with your SAS software.

**New Goodies for the SAS® Programmer in SAS® Enterprise Guide® 4.3**

Chris Hemedinger, Senior Software Manager in SAS R&D, explores tools that help SAS programmers of all skill levels to create and maintain SAS programs with greater confidence and efficiency.

**SAS Web Report Studio Performance Improvement**

SAS Technical Architect Angela Hall will explain how to implement performance-improving mechanisms on your SAS system using SQL pass-through functionality.

**That's Not What I Meant: Adventures in Defining New Variables**

Statistics professor John Bailer will explore ways to confirm that you have correctly constructed or recoded variables, illustrating surprises that might arise when SAS® does what you said instead of what you meant.

**Feeding Output from PROC SUMMARY into a SAS®9 OLAP Cube**

SAS Regional Education Manager and Instructor Michelle Buchecker will teach you how to take your existing data sets and turn them into SAS®9 OLAP cubes.

**PROC REPORT Basics: Getting Started with the Primary Statements**

SAS® Certified Advanced Professional Art Carpenter will teach you how to use PROC REPORT to summarize and display your data more effectively.

**Visualization of Data and Models**

JMP's chief architect John Sall teaches you how to get meaningful visual analyses to answer your business questions.

Figure 11. Archived SAS Talks Webinars (continued)

-  **CSSSTYLE: Stylish Output with ODS and SAS® 9.2**
This session will teach you how to use cascading style sheet (CSS) files – enabling you to add style (e.g., fonts, colors, spacing) to your Web documents.
-  **Making SAS® Enterprise Guide® the Center of Your Business**
This session will explore how to analyze information in SAS Enterprise Guide and publish it to your organization quickly and effectively
-  **SAS® Formats and the Format Procedure**
During this session, discover the benefits and convenience of the FORMAT procedure.
-  **Modifying ODS Statistical Graphics Templates in SAS® 9.2**
This Webinar will show you how to apply the programming techniques for modifying the default graphs.
-  **An Introduction to Creating Multi-Sheet Microsoft Excel Workbooks the Easy Way with SAS®**
This talk provides basic information on how to use Base SAS®9 software to quickly and easily create multi-sheet Microsoft Excel workbooks.
-  **SAS® Enterprise Guide® for the Programmer: What's In It for Me?**
This Webinar will show you how SAS Enterprise Guide helps you exploit the power of SAS and publish dynamic results in a Microsoft Windows client application.
-  **An Introduction to SAS/IML® Studio**
This Webinar highlights the essentials needed to begin using SAS/IML in SAS® 9.2.
-  **Getting Started with ODS Statistical Graphics in SAS® 9.2**
This talk will give you the essentials you need to begin using ODS Graphics in SAS 9.2.
-  **Social Networks in Data Mining: Challenges and Applications**
The methodology presented in this session easily generalizes to other areas where social networks also play a crucial role, including customer acquisition, risk management and fraud detection.
-  **SAS® Information Management: Leverage and Extend Hadoop**
In this webinar, we'll explore the technology behind how SAS both simplifies and augments Hadoop.
-  **Using Data Mining in Forecasting Problems**
This session explores how to wring maximum value out of available time series data, including methodologies and examples.

Conclusion

As technology continues to expand to newer and greater horizons, it is essential that students, professionals, and anyone with a curiosity for knowledge have a way to differentiate themselves from the crowd. The savvy SAS user accomplishes this by accessing the readily available MOOCs and videos with a computer (workstation, laptop or “smart” device), an Internet connection and a web browser, to learn techniques, tips, code examples, and other approaches from the comfort of their living room, bedroom, dorm, office, beach house, or countless other places in the world; downloading and using the “free” SAS University Edition software to learn data access, manipulation, programming, statistical, and reporting techniques; accessing a wealth of published conference “white” papers using lexjansen.com; accessing technical content on support.sas.com, and SAS Channel YouTube videos.
