

SAS Programmer's Challenge: It's All About the Options

Art Carpenter
California Occidental Consultants

ABSTRACT

Come and join us at the SAS Programmer's Challenge. This lively, informal, and fun event will feature a number of puzzles and questions on various aspects of SAS programming - especially relating to options. The problems and questions will vary from easy code situations, to 'How does SAS think in this situation?', to situational DATA step logic, to the situations we get ourselves into.

This will be a great chance to pick up a few coding tips. You can come to watch. You can come to learn. You can come to compete (mostly against yourself).

ABOUT THE AUTHOR

Art Carpenter's publications list includes four books, and numerous papers and posters presented at SUGI, SAS Global Forum, and other user group conferences. Art has been using SAS® since 1977 and has served in various leadership positions in local, regional, national, and international user groups. He is a SAS Certified Advanced Programmer™ and through California Occidental Consultants he teaches SAS courses and provides contract SAS programming support nationwide.
